STILL THINK THIS IS FUNNY? Not one of these taxes existed 100 years ago, & our nation was the most prosperous in the world. We had absolutely no national debt, had the largest middle class in the world, and Mom stayed home to raise the kids.

What happened? Professional politicians. They realized that they could purchase your vote with your own money by redistributing the tax dollars of the productive to the less productive. While we are all created equal, we are not equal in abilities. Some work harder. Some are smarter. Some more creative. The producers get hit the hardest. When you tax productivity you will get less of it. The money is funneled to the least productive members of society. When you subsidize unemployment you will get more of it.
